

## Sidchrome SCMT50200 - Tool Chest - 10 Drawer

### Product Description

---

When you have invested in quality tools, you need a quality storage solution to keep them readily accessible at a moment's notice.

This extra-deep tool chest is designed to fit your preferred tool quantity, giving you convenient, fast access to your collection. The extra-deep drawers allow you to make maximum use of the space so you are not straining for hard-to-reach tools at the back of the drawers.

Featuring three full-width drawers and two rows of smaller drawers, it's perfect for your SIDCHROME collection. The heavy gauge steel construction means it's strong, sturdy and reliable, while the rolled-edge drawers ensure smooth, fast access when needed.

The drawer liners protect your tools while in storage and with 100% drawer access, you can be confident of maximising every square inch of space in your tool chest, which is great when working in close confines or in smaller workspaces. Each drawer is lined with EVA foam, which withstand most workshop fluids, helping keep your tools in top-quality condition.

The lockable cabinet means you can keep it safe from thieves, plus the upper central drawer is independently lockable too, giving you a place to keep private paperwork or assets locked while the rest of the chest is open.

The wide-grip handles make it easy to cart from space to space in your workshop or bring it in your ute to keep your entire collection with you on the road. It's UV resistant too, so if you're working outdoors or in a sunny workshop, your tools will be protected from the sun.

The chest is designed to fit atop our roller cabinets, giving you the freedom to create the custom solution that best suits your requirements.
