

Kincrome K15353 - Plastics Welding Kit 10 Piece

Product Description

Features

- The Kincrome Plastic Welding Kit is a must have for any workshop, garage or home!
- This kit has been designed to accompany and be used with the Kincrome soldering irons and other gas soldering irons alike within the market.
- The Kincrome Plastic Welding Kit is ideal for welding and repairing plastic parts or components such as vehicle bumpers, broken headlight fixings, cracks, fractures and deep scratches in many plastic materials.
- The kit comes with everything you will need to weld or repair the task at hand, from 9mm and 12mm welding tips, 24 plastic welding rods which consist of Polypropylene (PP), Polyethylene (PE), Polystyrene (PS) and Acrylonitrile Butadiene Styrene (ABS) materials, 3 x Stainless Steel Reinforcement mesh sheets and all the accessories you need to plastic weld or maintain your kit.
- The plastic welding kit does NOT come with the required soldering iron, but can be added to any gas soldering iron allowing you to weld or repair plastic materials instead of sending your damaged or broken material to a costly repairer.
