

Kobelco 100063 - Electrodes Kobe LB52-18 x 4mm 5kg Pack

Product Description

Description

- Kobe LB52-18 x 4.0mm x 5 Kg
- An iron powder low hydrogen covered electrode for all-positional welding. Excellent x-ray soundness & mechanical properties.
- Smooth arc, neat bead appearance & easy slag removal. For use with heavy structures, rolling stock & heavy machinery.

Features

- Excellent arc stability
- Higher deposition rates than an E7016
- Suitable for high tensile steels
- Tough weld metal

Welding Positions

- All positions

Applications

- Structural steel
- Earth moving equipment
- Pipe welding
- Pressure vessels

Specification

- AWS Specification: A5.1 E 7018
- Industry Specification: A5.1 E 7018
