

## Harris 100103 - Aluminium Welding Electrodes 3.2mm

### Product Description

---

#### Description

- Aluminium DC Electrode x 3.2mm x 0.454 Kg
- Coated electrode providing high speed deposition of dense, machinable welds.
- Use for fabrication & repair of cast & wrought aluminium, foundry defects, machining errors & salvage work Ideal for repairs & maintenance (DC reverse polarity only).

#### Features

- Extruded electrode for MMAW Aluminium
- Low cost setup for small jobs
- Versatile
- DC + only

#### Welding Positions

- Flat, Horizontal, Vertical Up and Overhead

#### Applications

- Repair and maintenance of cast and wrought aluminium
- Maintenance and repair workshops
- Foundry defects

#### Specification

- AWS Specification: A5 E 4043
