

Bossweld 300112H - Filler Rods Manganese Bronze Flux Coated 2.4mm x 1kg

Product Description

Description

- Bossweld Manganese Bronze F/C x 2.4mm x 1Kg
- Low fuming self fluxing manganese bronze filler rod. Ideal for braze welding of malleable iron, steel & cast iron.
- Also used as a maintenance rod. Its high bond strength makes it suitable for use in a wide range of self-fluxing applications.

Features

- Low fuming, flux coated general purpose bronze filler rod
- Ductile weld metal
- Good mechanical properties

Applications

- Excellent maintenance wire
- Suitable for steel, stainless steel, copper and nickel alloys

Specification

- AWS Specification: A5.8 RBCuZn-C
- Industry Specification: A5.8 RBCuZn-C
