

Milwaukee 48228030 - Jobsite Organiser

Product Description

- The Milwaukee Jobsite organiser is the most versatile of its kind and was designed for increased productivity and more capacity.
- Designed with the needs of the professional tradesman in mind, the new organiser includes (203mm (8") small and (2) large bins that can be mounted on common jobsite materials by utilising the integrated screw slots.
- A no travel seal around the perimeter of each bin prevents small items from migrating from one bin to the other, and the convenient 101mm (4") x 101mm (4") size of the small bins allows them to be easily swapped out with a common electrical box.
- To allow users the option of carrying multiple organisers at once, the Milwaukee 508MM (20") Jobsite Organiser contains innovative side clips, that not only allow the units to be attached together, but provide full access to each when they are stacked on top of one another.
- For added durability, the new unit features a reinforced rib for strength and an integrated weather seal gasket to prevent water intrusion.
- Mountable Bins
- Full Access When Stacked
- 20% More capacity
- Weather Seal
- No-travel bins seals
