

Sutton D1050700 - Jobber Drill 7.0mm Viper

Product Description

The Viper Bit has been developed specifically for the semi-industrial trades person and the home handy man. Ideal for machine and hand held drilling in a wide range of ferrous & non-ferrous materials such as steel, aluminium, brass, wood & plastics. The Viper point design is 2 times faster than conventional drill bits. The 118° split point is self-centering, minimising wandering when starting and requires less power when drilling. The range also features a reduced shank on larger sizes to suit 10mm power drill chucks.

Features

- 118° Standard Point
- Drill sizes above 10mm & 3/8" feature reduced shanks to suit 10mm drill chucks
- Made from M2 High Speed Steel (HSS) offering the best combination of strength, heat & wear resistance
- Bright finish for general purpose applications, non-ferrous metals & plastics

Specifications

- Diameter: 7mm
- Flute Length: 69mm
- Overall Length: 109mm
