

## Bordo 3840-20 - Countersink 90 Deg. 20mm Cross Hole

### Product Description

---

For countersinking and deburring in a wide range of materials including ferrous and non-ferrous metals. These tools are best used as deburring tools, where a burr, or sharp edge, from a previous machining operation needs to be removed for cosmetic and safety reasons, however they may be used in softer materials (such as wood or plastic) to create a countersunk hole for a screw.
