

Stop the Drops H01069 - Auto Lock Coil Tether

Product Description

The Technique Tool Coil Lanyard is the perfect tethering solution for tools weighing up to 2.3kg. With a relaxed length of 360cm, and a stretched length of 157cm, this tool lanyard is designed to stay out of the way when not in use, providing excellent tool height safety and tool drop prevention. The self locking karabiners are lightweight and easy to use. The Technique Tool Coil Lanyard is the perfect tethering solution for tools weighing up to 2.3kg. With a relaxed length of 360cm, and a stretched length of 157cm, this tool lanyard is designed to stay out of the way when not in use, providing excellent tool height safety and tool drop prevention. The self locking karabiners are lightweight and easy to use.

Lightweight auto locking (dual action) aluminum karabiners provide the highest level of safety and also feature swivel action to enable use without tangling.

An extra-thick PU coating around the coil prevents kinking and allows the coil to retain its form. Suitable for use from holsters, belts, harnesses and tool pouches alike, this Coil Tether is a versatile solution that is resistant to both heat and sharp edges.
