

## Stop the Drops H01064 - Electronic Equipment Tether with Micro Catch

### Product Description

---

The Electronic Equipment Coil Tether is engineered to withstand harsh work environments. The ballistic nylon heavy-duty swivel snap quickly attaches to any Tool Catch attachment, while a side release loop attachment provides a quick and secure solution to tethering cameras, cell phones, radios, and other small objects. The tether combines perfectly with the Micro Catch to create drop prevention solutions for items that otherwise are very difficult to tether.

- 1 x Technique Micro-Catch is included with each Lanyard.
