

P&N 149010032 - Step Drill 5/32 - 1/2" Tinite Coated

Product Description

P&N Quickbit Impact Step Drills are ideal for sheet metal without pre-drilling. During drilling, the next step deburrs the previously drilled hole. These bits are suitable for use in sheet metal, aluminium, plastic & fibre glass.

Features

- 1/4" hex shank suits impact drivers and quick change adaptors
- Fixed drilling steps incrementally increases hole size in a controlled manner
- Non-skid tip is easy to sharpen
- Straight flute with two cutting edges for greater control through steps
- Made from M2 High Speed Steel (HSS) offering the best combination of strength, heat & wear resistance
- TiN coating provides 3 to 6 times longer tool life than uncoated tools and is suitable for general purpose use in a wide range of applications
