

Kincrome CL750 - Heavy-Duty Hand Riveter 265mm (10.5")

Product Description

The CL750 Riveter offers a lightweight but strong cast aluminium body with a high leverage Chrome Molybdenum (Cr-MO) handle so you can apply additional force to the larger/harder rivets without fear of breaking the handle.

The riveter has a long nose design so you can install rivets in tight or hard to reach areas, on board storage for the four different sized nozzles, an integrated nozzle/jaw spanner holder, an ergonomically designed grip and tough hardened jaws that can be used with both Aluminium and Stainless Steel rivets, unlike many entry level rivet guns.

- Cast Aluminium Body
- Cr-MO Handle
- Triple Moulded Grips
- Four Interchangeable Nozzles (2.4, 3.2, 4.0, 4.8mm)
- Spanner with Spanner holder
- Weight: 0.5kg
