

Renegade 66622 - Force Hydraulic Gear Puller Set

Product Description

These are amongst the most comprehensive and versatile Hydraulic Gear Puller sets on the market. These sets include 4", 6" and 8" legs to be used with either the twin or triple heads. This will cover countless applications such as removal of gears, pulleys, bearings etc from shafts or axles. Tradespeople working on motor vehicles, agricultural machinery, manufacturing machinery or similar will find these sets to be invaluable. Also supplied is a 75mm - 150mm bearing separator combined with a industrial duty "H" beam and connecting bolts. The hand operated hydraulic ram comes complete with two extensions and a centreing tip. This brilliant puller set is supplied in a robust blow mould carry case.
