

Sidchrome SCMT22318-440 - Spanner Combination 18mm - 440 Series

COMBINATION 18mm - 440 SERIES

Product Description

Sidchrome's 440 Pro Series spanners incorporate the best features of Sidchrome's famous spanners in a brand new style resulting in increased performance in every situation. Their revolutionary design offers exceptional strength and delivers more torque with less effort. Tighter and more difficult areas are easier to get to with the new sharp step down on the ring too. The spanners within this set feature Sidchrome's Torque Plus fastening system. This allows greater contact with the flats of fasteners, providing greater torque to enable easier fastening. The open end spanners feature Sidchrome's Anti Slip Design reducing slippage and knuckle injury. These tools have been manufactured to meet and exceed international quality standards allowing them to withstand harsh working conditions on any worksite.
