

Kincrome K3115 - Combination Gear Spanner 15mm

GEAR SPANNER - 15mm

Product Description

The Kincrome Gear Spanner has all the benefits of standard spanners and more. The strong fine gear ratcheting ring end needs as little as 5° of sweep to move fastener, a standard fixed ring end needs a minimum of 30°, or 6 times the area. The narrow and thin head, combined with fine gear tooth design makes the Kincrome Gear Spanner suitable for working in tight and hard to access areas where a ratchet and socket will not fit.

Features

- The ratcheting ring feature allows increased working speed, eliminating the need to remove the spanner from the fastener after each turn
- With a 0° offset, the Gear ring head has directional arrows on both sides indicating either forward or reverse direction
- To change direction simply turn the spanner

Specifications

- Size: 15mm
- Offset: 0°
- Finish: Mirror Polish
- Material: Chrome Vanadium Steel (Cr-V)
- Standard: ASME & DIN
