

## Kincrome K5284 - T Handle Hex Key Set Tamperproof 8 Piece

### Product Description

---

The Kincrome welded T-handle range offers a premium solution for professional and DIY users who prefer the speed and ease of the T-handle design.

T-handles offer greater speed with a flywheel-effect, which allows the handle to spin freely, removing the fastener quick and with ease. The long shank is ideal when working on hard to reach areas, giving better access through a fully welded design, which also allows for greater torque control, limiting the risk of damage to the tool and fastener.

Each T-handle is manufactured with a Chrome Vanadium Steel (Cr-V) handle and an S2 Steel shank, incorporating a fully welded design for strength and durability. The handle is also PVC dipped to increase user comfort, reduce hand fatigue and maximise torque.

Includes Sizes: T10H, T15H, T20H, T25H, T27H, T30H, T40H, T45H

### Features

- Fully welded design
- Shank manufactured from high quality Cr-V S2 steel
- Handle manufactured from high quality Cr-V 6150 steel
- Black phosphate finish for corrosion protection
- PVC dipped (chemical resistant) handles for comfort and maximum torque
- Available in Metric, Imperial, TORX® & Tamperproof TORX®
- Also available individually
