

Milwaukee 48228302 - Packout Jobsite Cooler

Product Description

Our PACKOUT Modular Storage System is the industry's most durable and versatile storage system. The PACKOUT Cooler has an impact-resistant molded base that you can connect with other PACKOUT system components via integrated locking cleats. The leak-proof food grade liner and dual layer insulation ensure that the cooler holds ice for up to 24 hours. We constructed the durable jobsite lunch cooler with tear-resistant 1680D ballistic material, heavy duty zippers, and all-metal hardware so it can withstand harsh jobsite environments. The heavy duty cooler features an integrated tape measure clip that also works as a bottle opener and 4 storage pockets, allowing you to carry your food, beverages, and personal items to the job site each day. Our PACKOUT Modular Storage System allows you to customise and build your own storage system to easily transport and organise your tools and accessories.
