

Star S106-171G - Spray Gun 1.7mm Gravity Feed Auto Finish

Product Description

A very high quality gun. These gravity style guns are preferred by some operators & are especially popular in the automotive panel trade. They are excellent for spraying in confined areas & have less chance of paint feed problems more likely on suction type guns. Will also use all of the paint in the pot leaving no expensive wastage. This also makes them easier to clean! These Star gravity guns are easily as good as anything available elsewhere regardless of price.

- 1.7mm Stainless Steel Needle Assembly
- Includes 0.7 x Litre Nylon Pot
- Weight: 0.8Kg
