

Kincrome K12190 - Ratcheting Vehicle Positioning Jack 330mm

Product Description

The Kincrome Vehicle Positioning Jacks make manoeuvring vehicles around the workshop quick, safe and easy!

The Ratcheting design is superior to hydraulic systems as it is significantly more durable, does not require annual hydraulic fluid replacement, does not blow seals, will not leak and can be stored on their side without the risk of air-lock.

They are rated to handle up to 680kg per wheel making them suitable for use with most cars, 4WD's and some light trucks.

They are designed to fit tyres up to 330mm in width and have a foot-operated ratcheting mechanism that squeezes the roller-equipped support legs together to lift the tyre off the ground.

The 360° swivel castors then allow you to move your vehicle in any direction with ease!

Kincrome VPJ's incorporate high-quality materials and design to ensure that they can stand up to professional use.

Features

- Mechanical Ratcheting
- 3-Section Steel Frame Construction
- Plastic Rollers
- 4" Nylon Castors (2 x Lockable)

Specifications

- Rated Capacity: 684kg
