

Kincrome K12152 - Hydraulic Bottle Jack 6,000kg

Product Description

Kincrome's range of Bottle Jacks are a must have item for any professional or DIY workshop!

Kincrome Bottle Jacks are designed to comply with the Australian Mandatory Standard AS/NZS 2693:2007 and incorporate a welded base design with double seals for better sealing, increased safety and usability in professional workshop environments.

Each Bottle Jack is precision machine-welded with a billet steel base, ensuring increased strength and stability under load.

Kincrome Bottle Jacks incorporate high-quality seals, materials and design to ensure that they can stand up to professional use.
