

Kincrome K6275 - Folding Scraper Liner Lock

Product Description

From removing paint, gaskets, stubborn adhesives or stickers, this scraper will make all those jobs and more easier and faster. The unique innovative design of implementing a liner lock mechanism, extremely common in knives, onto a scraper ensures that when the scraper is open it is secure and won't fold back on itself. Match that with the already proven blade locking mechanism from the K6261 Safety Scraper means that the blade has no movement when locked in ensuring a smooth, easy, safe scrape every time. The ergonomic gel grip handle and compact design means that whether it's travelling in your pocket, toolbox or hand, the scraper will not only feel good but look good as well.
