

Makita B-15805 - TCT Saw Blade 305 x 25.4mm 60T Metal Cutting

Product Description

Features

- Makita's range of steel cutting saw blades are designed to cut faster and cleaner.
- Specially formulated carbide, combined with a special tip design, resists breakage on impact and lasts longer when cutting mild steel, sheetmetal, pipe, channel and threaded rod. Cutting quicker and cleaner, Makita metal cutting blades will outlast traditional abrasive discs up to 30 times.
- Specially formulated carbide tips, precision ground for fast clean cutting
- Low sparking and minimal dust production
- Cool cuts with burr free edges
- Reduced cost per cut
