

Milwaukee M18HOAL-0 - 18V High Performance LED Area Light (Tool Only)

Product Description

The M18™ High Performance Area Light provides users with 4,000 lumens of TRUEVIEW™ High Definition Output designed to fill large areas with light. The area light features three modes and up to 12 hours of run-time when paired with an M18™ REDLITHIUM™-ION 5.0Ah Battery Pack (sold separately). The portable light features an AC inlet, giving the user the option to plug in an extension cord for all day runtime. The light head rotates 120° to direct light in multiple orientations. Its light weight, compact footprint, and integrated handle allows the user to easily transport or store it in bags, carts, and job boxes. The light includes integrated keyholes on its base for hanging on overhead surfaces. The area light features an impact-resistant design, making it able to withstand harsh jobsite conditions.
