

Noblefix J138 - Track & Bracket Set - 1m Track + 4 Curved Brackets + 600mm Strap

Product Description

Adjustable, extremely durable and versatile is just the start of the many features these restraints offer. The NobleFix Track & Bracket System can be as small as 100mm in length (suitable for securing a fire extinguisher) and up to 1 meter (to secure multiple air tanks on charter boats). The anodized aluminum track sections can be joined together to provide secure mass storage. The UV Stabilized Polypropylene brackets are made to last and the strong webbed strapping is available in varied lengths to suit your needs. NobleFix products have been independently tensile strength tested and can withstand 380 kilograms (3.5kN) of pressure to ensure OH&S practices are enhanced and not compromised. All components used to construct this product conforms to all relevant Australian Standards.
