

## Milwaukee MXFTL-0 - MX Fuel Tower Light/Charger (Tool Only)

### Product Description

MX FUEL™, Milwaukee®'s new equipment system, goes beyond the limitations of petrol and corded units, utilising the industry's most advanced batteries, motors, and electronics to deliver the best experience for users. This is equipment, redefined. The MX FUEL™ Tower Light/Charger is the new way to light the site. The portable 3 m light is designed for both indoor and outdoor use. The Tower Light provides up to 27,000 lumens of task and area lighting and withstands harsh jobsite environments. The portable Tower Light provides users with an easily portable, high output cordless light well-suited to remote applications and early phase construction. The 8" (203 mm) all-terrain wheels ensure users can easily roll the work light across uneven jobsites, whether it needs to be moved across rough terrain during early phase construction or across pan decking for early morning concrete pours. The Tower Light/Charger can be set up in seconds with a motorised mast that extends to a maximum height of 3 m and collapses back down to 1.2 m for easy transportation and storage. Once it is in place, 4 outriggers can quickly be deployed to provide more stability on uneven surfaces. The four multidirectional LED light heads give users the ability to cast up to 27,000 lumens of TRUEVIEW™ High Definition Output in several directions. When powered by our MX FUEL™ REDLITHIUM™ XC406 battery pack, the Tower Light/Charger runs for up to 10 hours on a single charge. It can also be plugged into an extension cord for all-day operation as well as charge any MX FUEL™ REDLITHIUM™ battery packs. It is compatible with all MILWAUKEE® MX FUEL™ REDLITHIUM™ batteries, giving users a hardworking and reliable power for equipment. The MX FUEL™ Tower Light/Charger is ONE-KEY™ compatible, allowing users to track, manage and secure the machine.

### Features

- Up 27,000 lumens (AC power) or 20,000 lumens (DC power) of TRUEVIEW™ High Definition Output
- Optimise runtime and brightness via ONE-KEY™
- 4 independently adjustable light heads ideal for task or area lighting
- Integrated charger function enables continuous use when required
- ONE-KEY™ compatible
- Motorised mast reduces setup time and minimises manual process
- Light heads can be set to desired height for task or area lighting

- 4 legs can be individually extended and retracted, allowing flexibility in various situations
- Designed for indoor and outdoor use, with IP55 (DC only) dust and water resistance
- Withstands winds to 56 kph
- Rugged 8" (203mm) rubber wheels for mobility across different jobsite terrains

#### **Specifications**

- PLATFORM: MX FUEL™
- RUN TIME: (DC) 10 hours / 6 hours / 3 hours (\*Using MXFXC406)
- CHARGE RATE: Integrated: 45 minutes (CP203); 90 minutes (XC406)
- LUMENS: (AC) 7,000/14,000/27,000 | (DC) 5,000/10,000/20,000
- IP RATINGS: IP55 (DC only)
- HEIGHT: 1,118mm (Retracted) / 3,048mm
- WEIGHT: 44.2 kg (Tool only)
- WARRANTY - TOOL: 2 Year
