

Peerless 00439 - Fluro Air Hose 30m

Product Description

From the launch of the Peerless Products Green Air Hose we had great success with it, as it's very flexible and soft to touch, making working with this hose so much easier compared to other brands.

PVC air hoses in the market kink like your garden hose and once they kink they always kink in the same place. This air hose is designed with the latest technology to not have any kink memory!

Being rubber coated this assists with the life of the air hose as most standard PVC air hoses after time absorb moisture or other contaminants as the outer layer breaks away.
