

Makita 191J56-5 - 18V 6.0Ah Battery 8-Pack in Makpac Case

Product Description

These 18V 6.0Ah batteries are compatible with 18V machines that have a star or a yellow connector plate (see picture)

The Makita 18V LXT Li-ion 6.0Ah battery, BL1860B-L, charges faster and works longer than standard Li-ion batteries, giving you and your cordless tools unmatched performance and productivity to take on the most demanding applications.

The Makita 6.0Ah battery combines more run time (100% more run time per charge than the Makita BL1830 3.0Ah battery) with a category-leading charge time of only 60 minutes, so it spends more time working and less time sitting on the charger. For added convenience, it also features an L.E.D. charge level indicator to monitor battery charge. The BL1860B-L resists self-discharge so it is ready for use even after long periods of little to no useage.

Features

- Integrated L.E.D. battery charge level indicator allows user to monitor battery charge
- Up to 100% more run time per charge compared to BL1830
- Fast 60 minute charging time
- Battery delivers consistent power and run time in extreme temperatures, even in winter (-20°C)
- Impact-resistant outer case and shock-absorbing inner-liner are engineered to protect the battery
- Sixteen contact terminals maintain a constant connection with the tool to help prevent power loss or fluctuation, even during high-vibration applications
- Battery resists self-discharge and remains ready for use even after long periods of storage
- Sensitive electronics are protected with a thick gel coating, preventing damage against dust and moisture
- Star protection computer controls - includes overload protection, over-discharge protection and over heat protection
- The battery and tool communicate, protecting your tool and battery from overload by cutting power when put under abnormally high current draw
- If the battery reaches a certain level of heat it will cut power to the tool, protecting the tool and battery from overheating

Specifications

- Voltage: 18V
- Amp hour: 6.0Ah
- Cell type: Lithium-Ion
- Charging time: 60 minutes
- Weight: 0.6kg

Makita Makpac Connector Carry Case System

- Stackable for storage and easy transportation
- Strong and collapsible handles
- Four different sizes to choose from
- Type: 1
- Dimensions (L x W x H): 395mm x 295mm x 110mm
- Weight: 1.3kg
