

Dawn 61244 - Sash Clamp 915mm Dual Purpose

Product Description

The new dual action sash clamps are designed and manufactured in Australia. Unlike other brands in the market, these DAWN clamps come with several unique features which would delight every woodworker.

- Jaws can be reversed to enable the clamp to be used as a clamp (B) or a spreader (A).
- Extra jaw depth enables clamping (C) or spreading (E) underneath the bar.
- Extra jaw width enables clamping (D) or spreading (F) on the side edge of the jaw.
- Spring loaded ball in securing pin prevents it from accidentally sliding out from the steel bar.
- Jaws are made from unbreakable super tough ductile (S.G.) iron.
- Flat bar manufactured from premium quality steel to ensure longer life.
