

## Irega INS-08-SWO - Adjustable Wrench 200mm Insulated Super Wide

### Product Description

---

- Size: 8" (200mm)
- For work on voltage up to 1,000V AC or 1,500V DC
- Each individual insulated wrench is submitted to a high voltage test according to the EN-60900 Standard (equivalent IEC-900). That is, 10,000 Volts for 10 seconds, and only those that pass the test are accepted
- The handles are insulated with "plastisol" material made of three layers of different colours to warn of danger due to damage - Red (Guaranteed), Orange (Caution) & Yellow (Danger)
- **Important:** Insulated adjustable wrenches cannot be homologated to VDE standards because the part used for adjustment (the knurl) cannot be insulated. Consequently, complete user's security cannot be guaranteed
