

Kincrome K9023 - Soft Face Hammer 50mm Polythene/Nylon

Product Description

- Kincrome Soft Face Hammers are generally used when a softer blow is called for than that delivered by a Metal Hammer
- Soft Face Hammers are typically used to form sheet metal as they generally don't leave marks
- Polythene Heads are ideal for use on soft metals such as aluminium
- Nylon Heads are ideal for use on harder metals such as steel
- Light weight Aluminium Die Cast Handle & Head
- Available In 3 Sizes: 25mm, 38mm & 50mm
- Replaceable Polythene and Nylon Heads available separately
