

Kincrome K8154 - Ratcheting Gear Puller 5 Ton

Product Description

The Ratcheting gear puller range combines many more features than the standard gear puller. The features on the Kincrome Ratcheting gear puller range allow the user to quickly and easily convert the Gear Puller from 2 to 3 Jaw configuration depending on the user requirements. The puller jaw legs has a Ratcheting action which allows the jaws to be held in place making aligning and attaching much easier and can be easily reversed without tools for either INTERNAL or EXTERNAL use. All these additional features mean one product covers a broad range of functions and jobs rather than requiring other tools. The Kincrome Gear Puller Series is available in three sizes 2 Tonne, 5 Tonne, and 7 Tonne.

- Combination 2 and 3 Jaw
- Jaws easily convert from 3 jaw action to 2 jaw action with minimal effort.
